Claim Rejections - 35 USC § 112

1. Claims 1, 3-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, it is vague and indefinite as to whether or not "a first film" is referring to "a removable material"? furthermore, the phrase "the film may be eliminated if the optical security film has stripping agent...." is unclear as to whether "the film" is referring to "a first film", and it is uncertain whether or not this "first film" and "the stripping agent" exist?

In claims 3 and 4, there are no antecedent basis for "the confidential information" and "said security measure" in the prior claims.

In claims 3 and 5, the term "and/or" is indefinite. Correction is required.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Curiel (US 5913543).

The invention of claims 1-5 is unclear, with respect to the prior art rejection below, the claims will be given the broadest possible interpretation in view of the specification.

Art Unit: 1775

Curiel discloses a tamper evident article comprised of a transparent outer film (42), an adhesive (102), a hologram (122), an adhesive having differential adhesion properties (124), a polyester film (126) and an adhesive (128) (see Fig. 6 & 7, col 9 L 28-48).

The transparent outer film (42) which contains holograms particles (104, 106, 107, 108, 109, 110) is releasably attached to another hologram containing layer (102) (Fig. 6). Once the hologram in the outer film (42) is separated from the hologram in the layer (102). The layers can not be put back together, thus impairing the ability of someone to reuse the hologram (col 3 L 35-51).

Curiel is silent about engraving optical elements onto the removable material, nor does it teach the ability of resisting frictional forces.

One skill in the art would fabricate an optical security film using Curiel's idea and modify it slightly because the hologram can be embossed onto the films or layers (col 8 L 45-50), also having a security device in the removable piece and can not be put back together again was clearly discussed in Curiel (col 3 L 45-51).
